EXPERIENCE

Software Developer & Co-Creator, *Otter (otter-framework.dev)* ⧉   Nov 2022 – present

Otter is an open-source, cloud native framework to easily integrate peer-to-peer video communication within web applications.

- Engineered an auto-scaling serverless infrastructure on AWS to enable WebRTC functionality within web applications (HTTP/WebSocket API Gateways, Lambda functions, ECS with Fargate, and DynamoDB).
- Wrote a CLI tool to automate the provisioning and teardown of AWS cloud infrastructure (IaC) saving developers over 100 steps.
- Developed a React frontend application for private 1-on-1 meetings hosted by Otter (CloudFront with S3 Bucket), offering low latency audio/video communication, instant messaging, and file sharing.
- Containerized and deployed CoTURN, an open-source implementation of STUN/TURN protocols, in an ECS cluster with Fargate to support Otter's P2P connectivity.
- Built a simple API for developers to integrate Otter's functionality within their web applications.
- Secured HTTP/WebSocket API Gateways by using an API key and JSON Web Tokens.
- Optimized Otter by reducing the number of reads to DynamoDB resulting in an 80% decrease in latency.
- Authored a technical case study ⧉ on the design decisions and engineering challenges faced while building Otter.

Software Developer, *Self-employed*   Apr 2022 – Nov 2022
